

Solway Firth (additional information)

The Regulation 33 advice document for the Solway Firth Special Area of Conservation was originally produced by English Nature in February 2000. Since that time a number of features, as listed below, have become additional qualifying interests of the site. English Nature will revise the Regulation 33 advice to take account of these additional interests in due course.

List of additional qualifying interests for Solway Firth SAC

- Coastal shingle vegetation outside the reach of waves
- Dune grassland
- Glasswort and other annuals colonising mud and sand
- Reefs
- River lamprey
- Sea lamprey
